March 2008

International CAMLOG Congress 2008

From May 9–10, professionals from clinics, dental offices and dental laboratories from more than 20 countries will meet in the Congress Center Basel, Switzerland, for the CAMLOG Congress 2008. Guided by the theme: “*Science meets practice – practice meets science*”, a faculty of world-wide renowned speakers will present the current state of implant dentistry in its entire scope.

In the course of the CAMLOG Congress 2008, Prof Rolf Ewers, President of the **camlog foundation**, will also introduce and launch the **camlog foundation** Research Award Competition 2009. This Research Award Competition provides a scientific platform for systematically communicating with promising future leaders in the specialty thus developing mutually beneficial relationships.

In the Congress poster competition, high-quality research results, clinical and clinical case studies and dental laboratory case documentations of practical interest in the field of implant dentistry will be presented.

For the detailed Congress program, the guidelines for the poster competition and a Congress online registration form, please visit:
